

R&D Project Manager

Eke

Permanent contract

As R&D Project Manager you will design and coordinate and implement models to run the R&D operation in the Solina Group. Reporting hierarchically to the Solina Group R&D Director, you will operate in the following fields:

Responsibilities

You lead cross-site and multi-functional teams by driving organisational and operational R&D programs, ensuring to accomplish the assigned projects on-time and within budget, this in accordance with the goals setup by the company.

You optimise the R&D processes (way-of-working) for better managing the company's R&D pipelines (raw material research, innovation pipeline, customer opportunities) and R&D sharing initiatives.

You act as interface with the IT-department by collecting the business requirements and implementing the R&D processes and reporting tools into Solina's CRM, ERP, PLM and BI-systems.

You coordinate organisational changes in the R&D platform.

Key tasks

Develop full scale projects plans.

Lead the implementation R&D projects from its design to completion.

Manage the day-to-day operational aspects of projects.

Set up a strategy for successful new projects or on-going projects within the deadlines, budget, scope and company's expectations.

Ensure that the necessary resources are available.

Plan projects timelines, projects tasks and follow projects through their entire lifecycle using appropriate tools.

Manage projects budget.

Coordinate and manage project team to achieve project objectives.

Support to project team and create a working environment that allows everyone to work to the best of their abilities.

Monitor and regularly report the progress of projects.

Manage changes in project scope, make adjustments and/or provide alternate solutions if necessary.

Identify projects risks and manage them.

Perform assessment of results.

Profile/Competences

You have a Master degree in Food Technology, Food Science or equivalent.

You have at least 5 years of experience in R&D and you have a high-level management experience in a technical/scientific organisation.

You have strong interpersonal skills, you are a result-oriented project manager and you focus both on quality and meeting deadlines. You are positive and energetic, assertive but constructive with excellent communication skills.

Fluent in English is essential.

You will be travelling 25% of your time (13 R&D sites)
